Human resources in the age of automation | McKinsey & Company

Understanding human beings as organisms with certain powers is key to addressing the problem set up by philosophers such as Descartes and Locke about the relation between mind and body, or mind and world. For Aristotle, the psuche or 'psyche' was not a separate part of the organism with a relationship of some sort to its body; a creature ...

On Human Nature and Its Implications for the Mind-Body ...

Higher output and increased productivity have been two of the biggest reasons in justifying the use of automation. Despite the claims of high quality from good workmanship by humans, automated systems typically perform the manufacturing process with less variability than human workers, resulting in greater control and consistency of product quality.
