...

User Manual. Shop-Vac ... CFM is a measure of the quantity of air moved by the vacuum motor at a particular system load, such as 2-1/2" orifice. Your actual system load is determined by the type, size and length of the hose used, the accessory tool used and the filter system used. A dirty filter system can drastically affect the suction and air ...

Also, any of our pumps that use what we call our standard head right here, this square head, whether it's our mini Dia-Vac® pump as you can see right here, or an explosion proof with a different motor, anything that's got this sort of a head... there may be a different shape in the diaphragm. For example, the mini uses a round.
