What is Regression Analysis? Lets take a
simple example : Suppose your manager
asked you to predict annual sales. There
can be a hundred of factors (drivers)
that affects sales. In this case, sales is
your dependent variable. Factors
affecting sales are independent
variables. Regression analysis would help
you to solve this problem.

Regression Analysis - Statistics Solutions

Therefore, the equation of the regression line is $\hat{y} = 2.71x + 88.07$. Even though we found an equation, recall that the correlation between x and y in this example was weak. Thus, this regression line may not work very well for the data. For example, for a student with $x = 0$ absences, plugging in, we find that the grade predicted by the regression ...
