Small wind energy is renewable, clean, and cost-effective. Depending on your location and the type of home wind system installed, you'll typically see a return on investment anywhere from six to 30 years. After that, the electricity the turbine produces will be virtually free. If your main goal is to lower your electric bill, a grid-connected wind system might be ideal for you.

Wind energy systems can be one of the most cost-effective home-based renewable energy systems. Depending on your wind resource, a small wind energy system can lower your electricity bill slightly or up to 100%, help you avoid the high costs of extending utility power lines to remote locations, and sometimes can provide DC or off-grid power.
