The Predator Paradox: Ending the War with Wolves, Bears ...

The Predator Paradox by John A. Shivik is a must read for anybody interested in predators and/or predation. This includes those who raise livestock, conservationists, ethical vegetarians and vegans, and others. He states that predators are good for the environment generally, but some do eat livestock.

The Predator Paradox: Ending the War with Wolves, Bears ...

The longest armed conflict carried out by the United States government, beginning in 1914, is our war with mammalian predators. The death toll is tremendous: federal agents kill ninety thousand wolves, bears, coyotes, and cougars every year. The paradox is that we need to safeguard ourselves and livestock from predators, while simultaneously preserving and protecting these key species – fundamental components of healthy ecosystems.

BIOL 830P: Predator Paradox 2017 SYLLABUS

In The Predator Paradox, veteran wildlife management expert John Shivik argues that we can end the war while still preserving and protecting these key species as fundamental components of healthy ecosystems. By reducing almost sole reliance on broad scale “death from above” tactics and by incorporating nonlethal approaches to managing wildlife—from electrified flagging to motion-sensor lights—we can dismantle the paradox, have both people and predators on the landscape, and ensure ...

Beacon Press: The Predator Paradox

Shivik's book, "The Predator Paradox: Ending the War with Wolves, Bears, Cougars and Coyotes," functions as a fair introduction for the non-initiated reader as well as a resource for those with vested interest in the issue, especially with his detailed analysis of animal psychology and applications of aversive stimuli to discourage predators from approaching livestock.
